

ERROL JUNE P. NICOLAS

LEAD SOFTWARE ENGINEER | REACT NATIVE | MOBILE

Philippines (Remote) | erroljunenicolas@gmail.com | linkedin.com/in/ejnicolas | github.com/nicolaserrol

PROFESSIONAL SUMMARY

Lead Software Engineer with 8+ years of experience architecting, developing, releasing, and maintaining production mobile and web applications, with a strong focus on React Native and modern mobile development. Strong hands-on experience with React Native, ReactJS, TypeScript, Expo, Redux, GraphQL, REST APIs, Supabase, and Firebase across fintech, healthcare, retail, fitness, automotive, and SaaS products.

Experienced in owning mobile features end-to-end, from technical architecture and implementation planning through third-party integrations, performance optimization, production releases, and ongoing codebase improvements. Led development of five production mobile applications and delivered customer-facing platforms supporting business transactions and operational workflows.

Strong background working with external service providers and APIs, including Apple HealthKit, Oura, Garmin, SurveyMonkey, Udemy Business, SendGrid, ActiveCampaign, and ServiceReef. Experienced using AI-assisted engineering workflows with OpenAI, Cursor, Windsurf, and Lovable.dev to accelerate product delivery while maintaining production-quality software.

CORE COMPETENCIES

React Native | Mobile Application Development | ReactJS | TypeScript | JavaScript | Expo | Redux | GraphQL | REST APIs | Mobile Architecture | API Integration | Third-Party Integrations | Performance Optimization | iOS | Android | Push Notifications | Deep Linking | Supabase | Firebase | PostgreSQL | SQLite | Git | Agile/Scrum | CI/CD | AI-Assisted Development | OpenAI API | OCR

PROFESSIONAL EXPERIENCE

Lead Software Engineer — Independent Contractor

February 2025 – Present

- Deliver end-to-end mobile and web software solutions across automotive, fitness, and business application projects, translating client requirements into production-ready technical implementations.
- Architect, develop, release, and maintain React Native applications using React Native, Expo, TypeScript, Redux, and modern mobile development practices.
- Lead continuous enhancement of a production vehicle-salvage platform, implementing mobile features and technical improvements aligned with operational efficiency and business objectives.
- Designed and implemented an AI-powered document scanning workflow using the OpenAI API to automate vehicle repair-estimate data extraction, reducing manual encoding effort and minimizing human error.
- Integrated external service providers and APIs including SurveyMonkey, Udemy Business, SendGrid, ActiveCampaign, and ServiceReef into ReactJS and Supabase applications to support automated workflows, communications, learning, and business operations.
- Developed and optimized a React Native fitness application with interactive health and analytics dashboards using Victory Native.
- Integrated Apple HealthKit, Oura, and Garmin to synchronize health data from multiple external platforms into a unified mobile experience.
- Work directly from business and product requirements to plan integrations, implementation approaches, feature scope, and technical solutions.
- Use AI-assisted engineering workflows with Cursor, Windsurf, Lovable.dev, and OpenAI to accelerate prototyping and feature delivery while maintaining production-quality implementation.

Mobile Solutions Engineer

MySuki Inc. PTE Ltd. | August 2020 – February 2025

- Led end-to-end development of five production mobile applications using React Native, Expo, TypeScript, and Redux.
- Architected and implemented mobile features supporting retail supply-chain operations and communication between principals, supermarkets, distributors, and sari-sari stores.
- Delivered a fintech capital assistance platform supporting digital business transactions and transaction-handling workflows.
- Worked across product requirements, implementation, integrations, and production maintenance to deliver customer-facing mobile solutions.
- Developed KPI and operational dashboards using Victory Native, providing enterprise customers with actionable visibility into business performance.
- Integrated mobile capabilities including push notifications, deep linking, local data handling, and external APIs.
- Maintained and enhanced production React Native applications through iterative feature development and codebase improvements.

Software Engineer

Pragtechnologies Corp. | December 2017 – August 2020

- Developed production healthcare applications using React Native, ReactJS, Expo, GraphQL, and TypeScript.
- Built customer-facing workflows for patients, doctors, and clinics, including appointment-management functionality.
- Implemented mobile and web features based on business requirements while working with API-driven application architectures.
- Contributed to application maintenance, feature development, and improvements to operational workflows.

TECHNICAL SKILLS

Mobile: React Native, Expo, iOS, Android, Push Notifications, Deep Linking, Mobile Architecture

Frontend: ReactJS, React Native, TypeScript, JavaScript, Redux, HTML, CSS

APIs & Backend: REST APIs, GraphQL, Supabase, Firebase, PostgreSQL, SQLite

AI & Automation: OpenAI API, AI Integration, OCR, AI Workflow Automation, AI-Assisted Development

Integrations: Apple HealthKit, Oura, Garmin, SurveyMonkey, Udemy Business, SendGrid, ActiveCampaign, ServiceReef

Development Tools: Git, JIRA, Sentry, Cursor, Windsurf, Lovable.dev

Engineering Practices: Agile/Scrum, CI/CD, API Integration, Performance Optimization, Production Application Maintenance

INDUSTRY EXPERIENCE

FinTech | Retail | Healthcare | Automotive | Fitness | SaaS | Enterprise Applications

SELECTED ENGINEERING HIGHLIGHTS

- 8+ years of professional software engineering experience with a strong focus on React Native and mobile application development.
- Led end-to-end development of five production mobile applications using React Native and Expo.
- Delivered fintech functionality supporting business transactions.
- Built and maintained customer-facing applications across multiple industries and business domains.
- Integrated multiple external platforms and service providers into production applications.
- Built AI-powered OCR automation using the OpenAI API.
- Developed applications targeting both iOS and Android.
- Experienced working across the full feature lifecycle: requirements, architecture, implementation, integrations, optimization, release, and maintenance.
- Founded Nuptl, a wedding technology startup, and launched both the React Native mobile application and web platform from product concept through production.
- As founder, led the product and engineering direction of Nuptl, owning product architecture, frontend development, backend integration, and iterative feature delivery.
